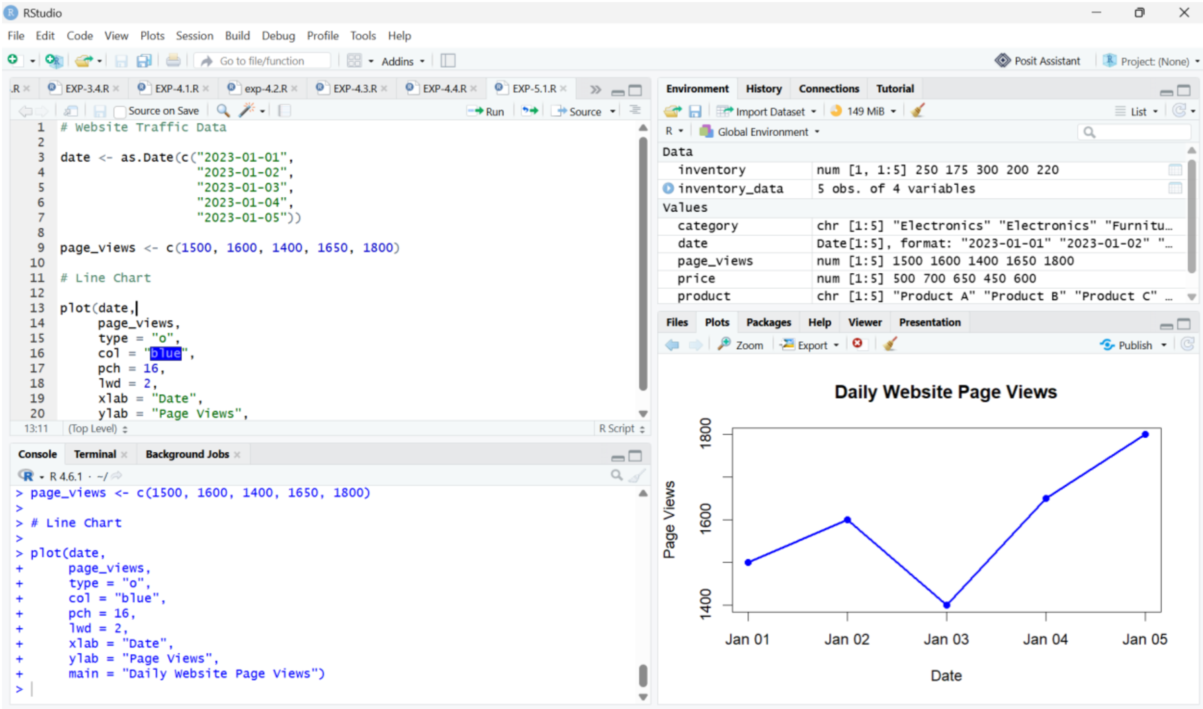
SET-5

QUESTION-1



CODE:

```
# Website Traffic Data

date <- as.Date(c("2023-01-01",

                  "2023-01-02",

                  "2023-01-03",

                  "2023-01-04",

                  "2023-01-05"))

page_views <- c(1500, 1600, 1400, 1650, 1800)

# Line Chart

plot(date,

     page_views,

     type = "o",

     col = "blue",

     pch = 16,

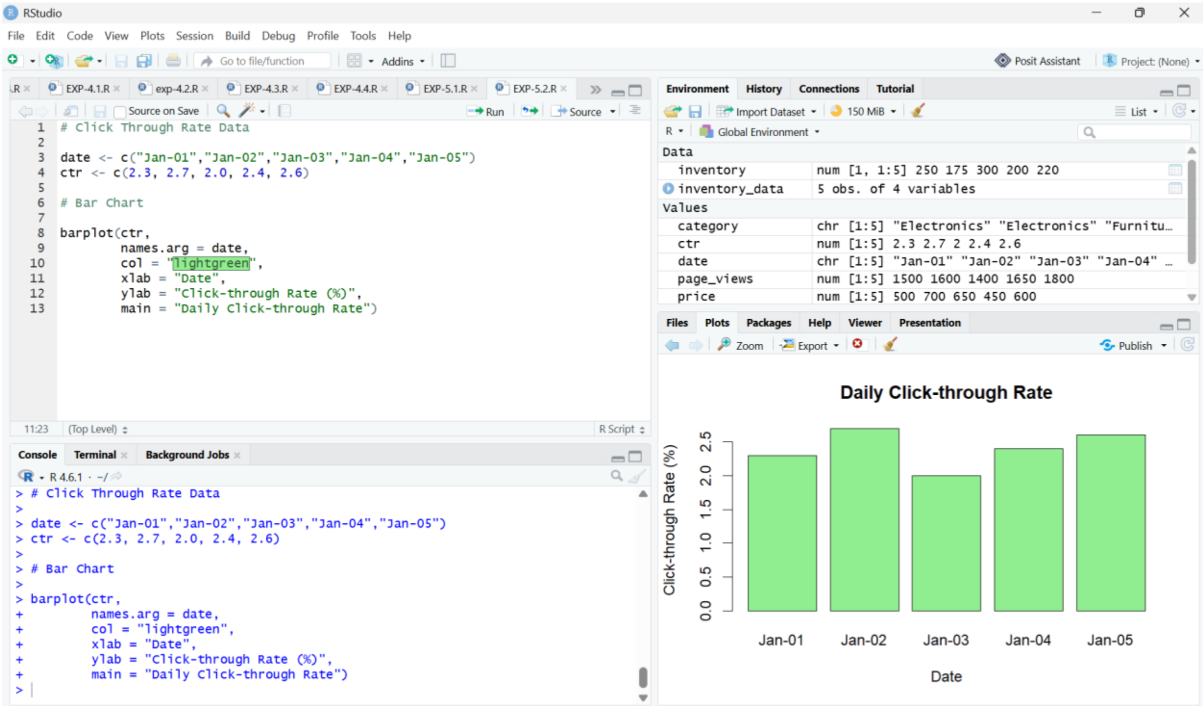
     lwd = 2,
```

xlab = "Date",

ylab = "Page Views",

main = "Daily Website Page Views")

QUESTION-2



CODE:

```
# Click Through Rate Data

date <- c("Jan-01","Jan-02","Jan-03","Jan-04","Jan-05")

ctr <- c(2.3, 2.7, 2.0, 2.4, 2.6)

# Bar Chart

barplot(ctr,

        names.arg = date,

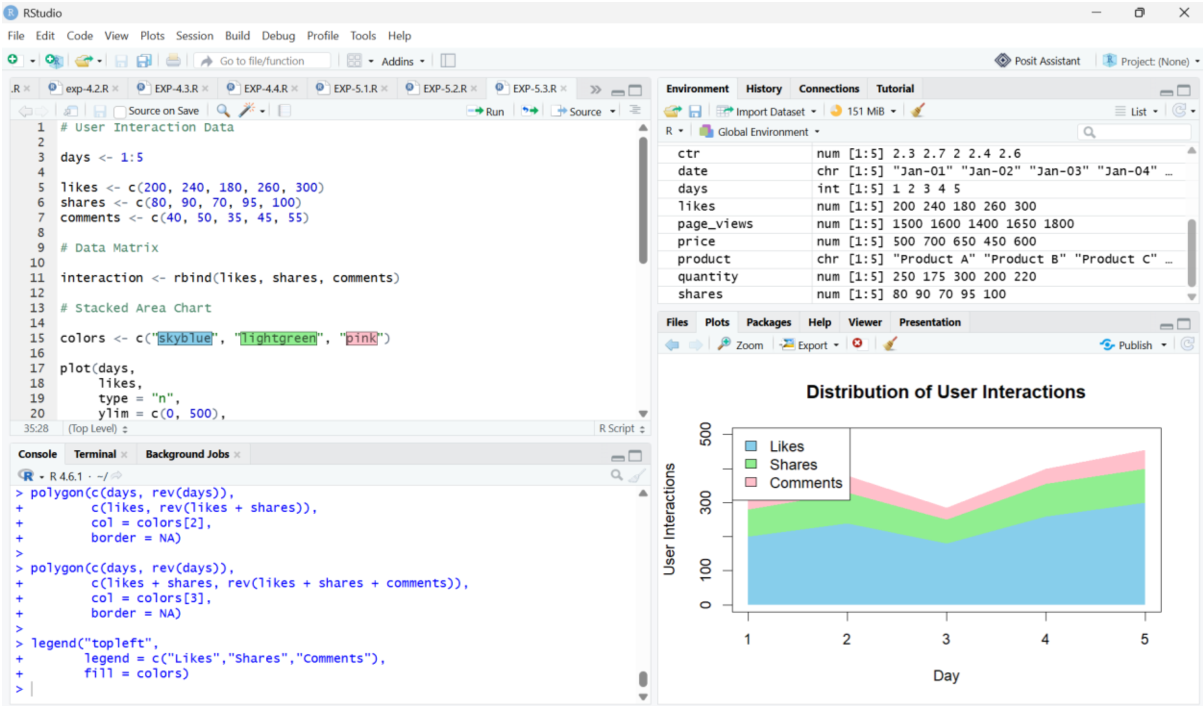
        col = "lightgreen",

        xlab = "Date",

        ylab = "Click-through Rate (%)",

        main = "Daily Click-through Rate")
```

QUESTION-3



CODE:

```
# User Interaction Data

days <- 1:5

likes <- c(200, 240, 180, 260, 300)

shares <- c(80, 90, 70, 95, 100)

comments <- c(40, 50, 35, 45, 55)

# Data Matrix

interaction <- rbind(likes, shares, comments)

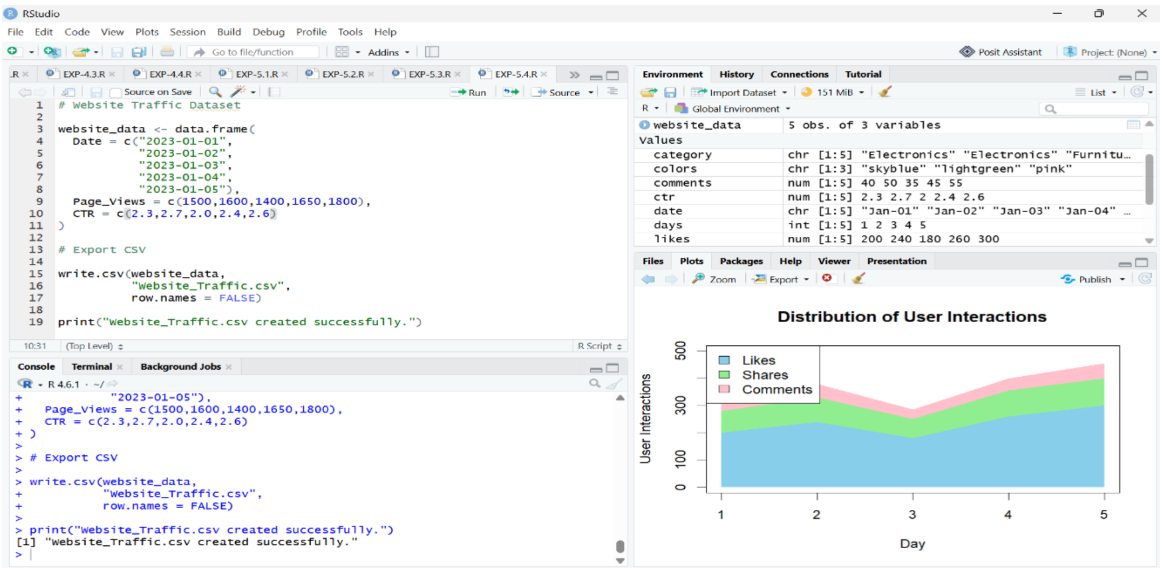
# Stacked Area Chart

colors <- c("skyblue", "lightgreen", "pink")

plot(days,
     likes,
     type = "n",
     ylim = c(0, 500),
     xlab = "Day",
     ylab = "User Interactions",
```

```
     main = "Distribution of User Interactions")
polygon(c(days, rev(days)),
        c(rep(0,5), rev(likes)),
        col = colors[1],
        border = NA)
polygon(c(days, rev(days)),
        c(likes, rev(likes + shares)),
        col = colors[2],
        border = NA)
polygon(c(days, rev(days)),
        c(likes + shares, rev(likes + shares + comments)),
        col = colors[3],
        border = NA)
legend("topleft",
       legend = c("Likes","Shares","Comments"),
       fill = colors)
```

QUESTION-4



CODE:

```
# Website Traffic Dataset
website_data <- data.frame(
  Date = c("2023-01-01",
          "2023-01-02",
          "2023-01-03",
          "2023-01-04",
          "2023-01-05"),
  Page_Views = c(1500,1600,1400,1650,1800),
  CTR = c(2.3,2.7,2.0,2.4,2.6)
)
# Export CSV
write.csv(website_data,
         "Website_Traffic.csv",
         row.names = FALSE)
print("Website_Traffic.csv created successfully.")
```
